Professional Experience

- Senior Software Developer - Ingeniusoft
- Tegucigalpa, Honduras*
July 2022 - Present
- Core developer on a large-scale enterprise ERP serving clients across multiple industries.
 - Implemented queues, background jobs, and service layer architecture for complex business logic.
 - Led multiple third-party integrations: payment gateways, external APIs, and authentication providers.
 - Full infrastructure ownership: code reviews, PR management, production deployments, and live DB migrations.
 - End-to-end CI/CD pipeline management on Linux-based server environments.

- Full Stack Developer - Freelancer
- Tegucigalpa, Honduras*
January 2024 - Present
- Founded and built a mobile app studio delivering AI-powered applications for end clients.
 - Designed and developed full-stack architecture: backend APIs, database systems, and cross-platform mobile apps (iOS & Android).
 - Implemented AI image generation features and subscription/payment systems from scratch.
 - Full product ownership: roadmap, UI/UX design, deployment, and ongoing user support.
 - Managed client relationships and end-to-end delivery of production-ready mobile products.
